

The 3rd International Conference

“Landscape and sustainable development”

April 23–24, 2021

The conference will be held online

Call for Papers

Slovenian society of geography teachers invites to

“Landscape and Sustainable development”

The aim of the international conference is to provide the participants with an opportunity to exchange their experiences and reach for ideas and novel approaches to teaching geography or any other school subject when focused on the field of sustainable approaches to landscape research.

We look forward to your presentations of various learning strategies, innovations, fieldwork, use of modern teaching technology and the like, with which you encourage students and their creativity. Examples of classroom lessons as well as new distance learning methods are welcome. It is also important to encourage young people to take an active part in understanding sustainable development in the region and to be actively involved in local communities and the environment.

The main emphases and directions of the importance of understanding the landscape and sustainable development and their placement in the classroom will be presented by invited lecturers from Slovenia and abroad. The international conference is an opportunity to exchange experiences, opinions and also socialize teachers of geography and related sciences.

At the conference, the following sub-themes will be addressed:

- protected areas and their development,
- environmental challenges in the development of the local community,
- biodiversity,
- environmental flexibility (models),
- circular economy,
- local care,
- local water resources,
- locally it is sustainable,
- other sustainable challenges.

Important dates:

The deadline for registration is **April 12, 2021**.
